Workshop Data Platform
Accounts & Security Handbook

Fictional document created for the InterSystems IRIS Vector Search workshop. Version 2026.11

1. Resetting a forgotten password

If you forgot your password for the Workshop Data Platform, open the sign-in page and choose "Forgot password". Enter the email address registered to your account. A reset link is sent within five minutes and stays valid for 30 minutes.

The new password must be at least 14 characters long and must not match any of your last five passwords. After a successful reset, all existing sessions are signed out on every device.

If the reset email does not arrive, check your spam folder first. Accounts that are locked after ten failed sign-in attempts cannot be reset by the user; contact the service desk to unlock the account.

2. Turning on multi-factor authentication

Multi-factor authentication (MFA) adds a second step to sign-in. On the Workshop Data Platform, MFA is required for administrators and optional for all other users.

To enable MFA, open Profile, then Security, and select "Add authenticator app". Scan the QR code with an authenticator app and type the six-digit code it shows. Save the ten recovery codes in a safe place; each code works only once.

If you lose your phone, sign in with a recovery code and register a new authenticator. When no recovery codes are left, the service desk must verify your identity before MFA can be reset.

3. Requesting more storage quota

Each workspace starts with a storage quota of 50 GB, shared by tables, indexes, files and manual backups. The current usage is shown on the Workspace overview page.

When usage reaches 90 percent of the quota, workspace owners receive an email warning. At 100 percent, new imports are blocked until space is freed or the quota is increased.

To request more storage, a workspace owner opens Billing, then Quota, and submits a request with the new size and a cost center. Requests up to 200 GB are approved automatically; larger requests are reviewed within two business days.
